

**We at Specialty Life insurance (SLi)** are proud to announce the launch of the second phase of our new life insurance portfolio - Specialty Life Evolution. Phase 2 of Evolution includes the addition of the Term 100 (T100) option, available to applicants in ages 18 to 80. **T100**, the same as **T10**, **T20**, and **T30** options, will offer up to **\$1,000,000** in coverage for applicants ages 18 to 50, **\$500,000** for applicants ages 51 to 70 and **\$250,000** to applicants ages 71 to 80.

The entire Evolution series is now powered by **Jenie™** - short for **Jet Evolution Non-Med Intelligent Engine**, is the first of its kind, a real-time virtual underwriter that uses the most current underwriting guidelines, incorporates advanced medical knowledge, and is available 24/7. **Jenie™** will automatically select the most suitable and tailored intuitive underwriting sequence for every applicant and provide an **instant** decision upon completion **without any additional requirements**. The entire process is designed to provide the **most accurate** and **safest** risk assessment outcome in the no medical life insurance market space.

With the upgraded Evolution series, SLi will continue to offer some of the most affordable plans in the market space. Our advanced process and tools have revolutionary features, including non-face-to-face (NFTF with no signature required) and additional signature options (e.g. via SMS or email) and the ability to combine multiple plans within one application and have it processed in **only one business day**.

We are always committed to supporting the success of our advisors. With the introduction of **Jenie™**, we are leading the way into the uncharted territory of Canadian life insurance business' underwriting and processing.
